

Integrated Packaging Systems FZCO provides complete solutions to the processing and packaging industries across the Middle East and Africa. Headquartered in the emirate of Dubai, we strive for detail and ensure that each customer receives the best quality in product and service.

We are currently looking for candidates who wish to be part of our dynamic team in the Middle East.

Process Engineer (m/f) for Aseptic Lines (Dubai, UAE)

Tasks and responsibilities:

- Supervision of machine commissioning with respect to parameter passing and process engineering, including installation qualification (IQ) and documented handover for validation
- Commissioning of complex retrofits on aseptic filling lines
- Trouble shooting on existing aseptic lines
- Consulting customers in terms of quality management

Requirements:

- University degree in Mechanical Engineering, Process Engineering, Food Engineering, Beverage Technology, or Milk Technology
- Alternatively: Technician with focus on Mechanical or Process Engineering
- Experience with fluid mechanics, thermodynamics, measuring and control technology and PLC automation
- Independent and goal oriented working style
- Fast learning ability and focus on essential aspects
- Strong communication skills in English
- High level of international mobility (90%) with focus on Middle East and Africa

If you are looking for a challenging opportunity in a multinational environment, please send your application and motivation letter to laura.mielenz@krones.ae. We look forward to hearing from you.
